Web developer

- Self-taught web developer with about **2.5 years of hands-on experience** in creating web applications.
- Most of the knowledge in **front-end** development and **React** ecosystem tools.
- **Passionate** software engineer constantly **seeking to learn and experiment** with new technologies.

PROJECTS

CineRadar - Movie suggestions with AI
Full-Stack   cineradar.devrokas.com

- Developed a web app using **Next.js** that leverages the **OpenAI** assistant **API** to provide **personalized** movie suggestions.
- Implemented a robust system for users to create and manage personal movie lists with filters and sorting options.
- Integrated **OAuth authentication** using Auth.js library to ensure secure access to user data.
- Built a TMDB movie database searching interface with **pagination** and **search filters**.

beFriendly - App for finding new friends
Full-Stack   befriendly.devrokas.com

- Created a **matchmaking system** in **Express.js** that pairs two users into a chatroom.
- Utilized **Socket.io** for **real-time communication**, enabling features such as message reactions, typing status, and progress tracking.
- Designed and built intuitive chat room interface with modern features like **message threading** and **emoji reactions**, improving user engagement.
- Containerized the **React** and **Express.js** mono repository with **Docker**.

MockSocial - Fake social media post screenshot generator
Front-End   mocksocial.devrokas.com

- Integrated a library to create a customizable image generator for 6 different social media platforms.
- Automated picture **storage cleanup** that **reduces maintenance** overhead and **solves** lack of storage space.
- Utilized Uploadthing tool to manage user **picture uploads**.
